Curriculum Overview

English

Students will read, view and comprehend imaginative texts. Students will create a written story including orientation, complication and resolution using a known character. They will then present it to an audience.

Mathematics

Students will partition, rename and regroup two- and three-digit numbers; order and represent numbers to at least 1000; describe and continue additive patterns; and recall and demonstrate proficiency with addition and subtraction facts and multiplication facts for twos.

Science

Students will describe how Earth's resources are used and the importance of conserving resources for the future of all living things.

HASS

Students will continue to study the impacts of technology over time and how this has affected the lives of people. Students are reviewing how transport is shaping the world around them.

The Arts – Drama

Students will make and respond to drama by using story books and bring them to life with voice, movement, soundscapes and improvisations. for performance.

Specialists

"Musical Stories"

Year 2 students will continue to make and respond to music. They will explore the way that music can evoke stories, including soundscapes and sound stories, program music and lyric stories.

Finish Lunch Boxes: Through the concept of lunch boxes, we will learn to discuss food items, colours and size. We will also explore culturally specific aspects of lunches in Japan. Mascots: Through the concept of Mascots student will be creating and describing their own mascot.

MESSAGE TARGETS (continued from Term 3)

In this unit, students examine the purpose of advertising and the techniques used to engage children. They explore health messages seen in advertising and how they can be used to make good decisions about their own and others' health and wellbeing.

WHAT'S YOUR TARGET - In this unit, students will demonstrate fundamental movement skills (instep pass, punt kick and one hand strike) and test alternatives to solve movement challenges (to reach their targets).

Students will be introduced to block coding using the computer program, Scratch. They will be guided through a set of beginner tasks to a culmination task of their choosing.
